

Public Involvement Meeting **CTH SN (Sand Lake Road)**

CTH OT to Alpine Lane
La Crosse County
May 3, 2016

Welcome to the public meeting for the CTH SN improvement project in La Crosse County. At today's meeting, you will see exhibits illustrating the proposed improvements and see a short presentation. You are encouraged to review the exhibits and provide input to any of the available staff from the La Crosse County Highway Department or their consultants SRF Consulting Group.

A public input form is also available for you to provide written comments. We appreciate your input and ask that you take a moment to complete the form and either drop it off before you leave or mail it to the address on the back of the form.

Project Description

The project improvements are on CTH SN from CTH OT to Alpine Lane in the City of Onalaska and the Village of Holmen in La Crosse County.

A paved and gravel shoulder and roadside grass ditch will be constructed from CTH OT to Pinecrest Avenue and a more "urban" section with curb and gutter and grass terrace (rather than a ditch) will be constructed from Pinecrest Avenue to Alpine Lane.

Proposed improvements include:

- Roadway improvements
 - Widen roadway shoulders to 10 feet (5 foot minimum paved)
 - Add turn lanes where appropriate
 - Reconstruct the intersection at CTH OT as a roundabout
 - Reconstruct creek bridge with pedestrian path
- Pedestrian and bicycle facility enhancements
 - Add 10 foot path on west side from CTH OT to Pinecrest Avenue
 - Add 5 foot sidewalk on west side from East Avenue to CTH OT
 - Add 5 foot sidewalk on west side from Pinecrest Avenue to Grant Avenue
 - Add 5 foot sidewalk on east side from Grant Avenue to Alpine Lane
- Improve drainage along CTH SN
 - Construct ditch system on the east side of CTH SN from Hanson Road to Schilling Road to carry storm water
 - Construct culvert across CTH SN near Hanson Road
 - Install storm sewer north of Grant Street

Construction

The CTH SN project will be constructed in two phases:

- Phase 1 (southern section) – CTH OT to Hanson Road
 - Includes roundabout construction at CTH OT and creek bridge reconstruction
 - Construction to begin in 2018
- Phase 2 – Hanson Road to Alpine Lane
 - Construction year TBD

Access to driveways will be consistently maintained during construction to allow property owners to get to their homes or properties. During construction non-local traffic will likely be detoured to adjacent roads. The creek bridge reconstruction will require a 3-4 month complete closure of CTH SN at the bridge. During that time local access to properties along CTH SN will be required to use adjacent roadways to get around the bridge.

Multi-use path construction may impact Sandy Knolls Park by requiring the boundary fence along CTH SN to move 15 to 20 feet back onto the property.

Schedule

- Final Design – Late 2016/2017
- Property Acquisition – Begin in Fall of 2016
- Public Involvement Meeting #3 – Spring of 2017
- Construction
 - Phase 1 (CTH OT to Hanson Road) – 2018
 - Phase 2 (Hanson Road to Alpine Lane) – TBD
