

Proper use of your outdoor wood fired furnace

Burn only clean dry wood

**Don't use the furnace on warm days when neighbors have open windows
When installing a new furnace find a location that won't affect your neighbors.**

**Extend the chimney height to help dissipate the smoke.
Don't use when there is no wind and the smoke settles to the ground.**

MATERIALS THAT MAY NOT BE BURNED.

Rubbish or garbage including but not limited to food wastes, food wraps, packaging, animal carcasses, paint or painted materials, furniture, composite shingles, construction or demolition debris or other household or business wastes.

Waste oil or other oily wastes except used oil burned in a heating device for energy recovery subject to the restrictions in Chapter NR 590, Wisconsin Administrative Code.
Asphalt and products containing asphalt.

Treated or painted wood including but not limited to plywood, composite wood products or other wood products that are painted, varnished or treated with preservatives.
Any plastic material including but not limited to nylon, PVC, ABS, polystyrene or urethane foam, and synthetic fabrics, plastic films and plastic containers.
Rubber including tires and synthetic rubber-like products.

Burning any of these materials is illegal, will create additional smoke and particulate matter and increase the chances that someone will complain about the smoke from your outdoor water boiler.
