For more information please contact La Crosse County Sanitarian:
David Sawvell at 608-785-9726 or Sam Welch at 608-9732
La Crosse County Health Department
Environmental Health Division
300 4th Street North
La Crosse WI 54601-3228

NOTE NEW REQUIREMENTS: After the soil test has been completed, the soil testers will turn in the original paperwork to the County Sanitarian office with the On-Site Inspection Fee (payment provided by the property owner or person requesting the Soil/Site Evaluation). Please help your soil tester by providing the tax parcel number for the property. Remember that the On-Site fee is in addition to any soil tester's fee or permit fees.

New Construction: A sanitary permit and well permit are required from this department prior to any zoning/occupancy/building permits. Please contact your plumber and/or well driller. A list is available from this office.

Replacement: "Wisconsin Fund Grant"... have the soil tester complete a hand boring in the area of the existing system for soil analysis as the county must verify the system failure.

The soil testers are listed at their request. The list is provided only to assist county residents in locating a certified soil tester and is not an endorsement by La Crosse County. There may be other qualified people not included on this list.
