

La Crosse County Disposal System Environmental Policy

The La Crosse County Disposal System is committed to conducting all of its operations in an environmentally responsible and sustainable manner. As a regional disposal system, we engage our partners by exchanging ideas about our environmental performance and supporting sound environmental policies. We believe that by being the “Responsible Resource” we provide our customers and stakeholders with the best long term value and assurance that their waste is managed safely and securely.

In carrying out this policy the La Crosse County Disposal System will:

- Embrace the waste hierarchy; seeking new and creative methods to manage waste as a valuable resource.
- Meet or exceed requirements of all laws, regulations, permits and other requirements applicable to all areas of operations.
- Be good stewards of the natural resources in which we have been entrusted; preserving and enhancing the land for this and future generations.
- Educate and empower employees to implement our environmental policies and objectives on a daily basis.
- Seek opportunities to gain knowledge of developing technologies, new programs and better methods to prevent pollution and minimize adverse impacts on the environment.
- Continually strive to improve our environmental performance by establishing objectives and targets, measuring progress and sharing our results.
- Lead by example to promote environmental awareness and responsibility in the communities that we serve.
