LA CROSSE, WI 54601-3200
(608) 785-9722

www.co.la-crosse.wi.us/Zoning/index.htm

SECTION 17.15 OF THE LACROSSE COUNTY ZONING ORDINANCE READS:

JUNK OR SALVAGE YARD

(1) For purposes of this chapter, any premises or building used for or in connection with the buying, selling, gathering and accumulation of, storing or shipping of, used appliances, iron, lumber, paper, rags, tires, demolition material or other waste or salvage material commonly included within the terms of junk or salvage, or the accumulating or wrecking of automobiles, trucks, tractors, snowmobiles, boats or other motor vehicles, or parts thereof, or machinery, shall be construed a junk or salvage yard.

(2) Every junk or salvage yard shall be surrounded by a suitable fence, not less than 6' in height and having no openings more than 2" in width except for necessary entrances and exits. All junk and salvage material shall be kept within such fence, but not piled against it. Such fence shall, at all times, be kept in a proper state of repair.

(3) Any person having any motor vehicle, truck or tractor, or trailer that is inoperable or unlicensed, including antique vehicles, shall be determined to be in the junk or salvage business if not confined within a building, except as follows:

(a) In commercial and industrial zoned districts, such vehicles may be stored in an open area but such storage of any vehicle shall not exceed 6 months.

(b) Vehicles that are eligible to be registered and licensed on a quarterly basis may be stored in an open area provided that such storage shall not exceed 9 months.

(4) The Zoning Committee shall have the authority to regulate the necessary area or acreage needed for a junk or salvage yard.

(5) Any person engaged in the junk or salvage business shall have a suitable building for an office constructed in conformity with the local building requirements as well as the requirements of the Wisconsin Department of Industry, Labor and Human Relations even though such individual or organization does not come within the purview of the Wisconsin Department of Industry, Labor and Human Relations.

SO.....What does this mean?

Simply stated Section 17.15 of the LaCrosse County Zoning Ordinance treats any property/property owner with an accumulation of junk or salvage as a junk or salvage yard.

Unlicensed and/or Inoperable vehicles are considered junk or salvage.

The definition of junk or salvage encompasses a wide variety of materials which may include, but are not limited to the following:

- Used Appliances**
- Metals**
- Lumber**
- Paper**
- Rags**
- Tires**
- Demolition Materials**
- Waste Materials**
- Non-running Snowmobiles**
- Non-running ATV's**
- Old Boats**
- Non-running tractors**
- Machinery parts**
- Automotive Parts**

ACCUMULATION and OUTSIDE STORAGE of any materials deemed JUNK or SALVAGE is prohibited EXCEPT within a LICENSED SALVAGE YARD, as identified within this ordinance.

LICENSED SALVAGE YARDS are only allowed on property zoned INDUSTRIAL DISTRICT and only after obtaining a CONDITIONAL USE PERMIT from the LACROSSE COUNTY BOARD.

All Property with an accumulation of junk or salvage materials, or unlicensed/inoperable vehicles are considered to be in violation of Section 17.15, with the only exception being a licensed/permitted salvage yard.

To bring your property into compliance with Section 17.15 you can:

- 1.) Place all unlicensed/inoperable vehicles, junk and salvage within a building.
- 2.) Remove all unlicensed/inoperable vehicles, junk and salvage from the property.
- 3.) Obtain the necessary zoning and necessary licenses/permits to become a salvage yard.

Included in this brochure is a list of businesses offering services to aid in cleaning up these types of materials and vehicles.
