

2,369 individuals in our community are living with dementia. **By 2040 this number will double.** Now is the time to begin learning and planning for how we can support our patrons and employees who will be affected by dementia.

Our goal is to help people remain safely in their communities, living well. It is important we link arms with local businesses who make up our community.

The resources on this sheet are designed as a ‘menu of options’ for your business in becoming Dementia Friendly
