

FREE Brain 
Check-Up Days

TYPICAL AGING OR SOMETHING ELSE??

Early Detection is important

A brain-check up is a wellness tool that helps identify possible changes in cognition. This is not a diagnostic test, rather, a tool that allows for conversation and planning. Just like blood pressure, cancer, or diabetes screening, brain checks can help you identify early; both the irreversible dementias and other reversible causes of dementia-like symptoms. Resources & support are available.

The Aging & Disability Resource Center of La Crosse County will hold monthly screening dates at various locations throughout the county. Brain checks are for people who are concerned about their cognition or concerned about symptoms they are experiencing; not intended for people currently under medical care related to their memory loss/diagnosis.

2nd Monday Monthly
Appointments 9am-
3pm
Various Locations
