The La Crosse County Historic Sites Preservation Commission is a branch of the County government that works to protect, preserve and nominate historic sites in La Crosse County. The Commission deals mainly with properties outside the County's municipalities, but inside the townships.

A historic site is usually considered to be a building, structure or archaeological site that is more than 50 years old and that is considered to be important either by who designed/built it, who lived there, what it was used for, or what it can tell us about the past.

The Commission meets on a monthly basis to discuss pertinent topics that deal with historic properties and archaeological sites in La Crosse County.

Please visit our website for more information on the county's historic sites, and how to nominate a property to the county's list of local landmarks.
