Application 000096

Title: King Street Greenway

Sponsor: 32246 - CITY OF LA CROSSE

Program Cycle: 2026-2030 TAP Cycle

(generated 10/31/2025 at 12:39:45 PM)

**Respond to the following questions to identify your application type:**

Check the primary location of your project below (Select **only one** option below)

NOTE: If located primarily within a TMA area, select the appropriate TMA from the list.

- Rural** (Population **less than 5,000**)
- Urban** (Population **5,000 - 49,999**)
- Urban Metropolitan Planning Organization (MPO)** (Population **50,000 - 199,999**)

MPO Name*
La Crosse Area Planning Committ
ee (La Crosse) ▼

- Urban Transportation Management Area (TMA)** (Population **200,000 or greater**)
 - Appleton, WI
 - Green Bay, WI
 - Madison, WI
 - Milwaukee, WI
 - Round Lake Beach - McHenry - Grayslake, IL - WI

Project Applicant Information

Sponsor (Sub-Entity)*
32246 - Municipality - CITY OF LA CROSSE

Project Sponsor UEI #

Project Title: *

King Street Greenway

Activity Questionnaire:

Using the fields below, identify your project type:

- Bicycle-Pedestrian (BP)
- Planning Study Infrastructure
- Construction of Turnouts, Overlooks, and Viewing areas (TOV)
- Historic Preservation and rehabilitation of historic transportation facilities (HP)
- Safe Routes to School (SRTS)
- Planning Study In-School Programing Infrastructure

Please Note: Applicants proposing a project within the SRTS eligibility category MUST complete the "School Demographics" and "Safe Routes to School Plan" sections.

Is the proposed project on a State Highway? Yes No

Name of State Highway

Does the proposed project intersect a State Highway? Yes No

Name of State Highway*
STH 53

Does this project run parallel to a state or federal highway? Yes No

Is the project on or parallel to a local road or street? Yes No

Name of the road or street*
King Street

If **yes** to any of these questions attach an existing typical cross-section of the roadway, showing right of way, travel lanes, shoulder and sidewalk (if applicable). Examples are available in [FDM15-1-5](#) attachment [5.3](#) of the WisDOT Facilities Development Manual (FDM).

Will this project be constructed as part of another planned road project? Yes No

Enter Project Owner and Construction Schedule here.

If **yes**, specify the source (federal, state, local, or other) and provide additional details such as state/federal project IDs

Provide Additional Detail Here

Will any exceptions to standards be requested? Yes No

Brief description

Rail Facilities:

Does a railroad facility exist within 1,000 feet of the project limits? Yes No

-- Select --

If yes, does the project physically cross a rail facility? Yes No

Will an easement from the Office of the Commissioner of Railroads (OCR) be required? Yes No

Is the proposed project location in an area with known safety issues? Yes No

Specify*
7 Bike/ped crashes in this project area in the last 5 years

(Consider applying for Highway Safety Improvement Program (HSIP) funds if applicable)

Location

County(ies)*
La Crosse

 Statewide

Region*
Southwest Region

Census Tract Number(s)

Census Tract 3

Municipality or Census Designated Place*
City of La Crosse

Describe location and boundaries:*

King Street from 3rd Street to 7th Street

Project Length
.33 miles

Street Address of Project (if located on a highway or road)
401 3rd Street South - 201 7th Street South

Identified Planning

If you have more than one link to include, please select "Yes" on the "Is the project identified in any other planning document?" question.

Is the project identified in a long-range transportation plan?

Yes No

If yes, link to plan*
<https://lacrossecounty.org/docs/default-source/met>

Is the project identified in a bicycle-pedestrian plan?

Yes No

If yes, link to plan*
<https://www.cityoflacrosse.org/home/showpublishedd>

Is the project identified in an outdoor recreation plan?

Yes No

If yes, link to plan

Is the project identified in a comprehensive plan?

Yes No

If yes, link to plan*
<https://www.cityoflacrosse.org/home/showpublishedd>

Is the project identified in any other planning document?

Yes No

If yes, link to plan

Other Concept Notes: Provide any additional relevant project information that has not been covered in another section of the application.

Describe:

This project includes three connecting highways that are city right of way. We have been working in coordination with Francis Schelfhout (WidDOT SW Region Bike-Ped Coordinator). Concept layouts have been shared with WisDOT and a coordination meeting was held June 29, 2021 during initial planning efforts.

305 / 2,000 Characters

Brief Project Summary

Provide a brief project summary in the field below. This information should adequately describe the scope of your project but should not be as detailed as the Narrative Response – Question #1.

The King Street Greenway will be an extension of the existing greenway from 8th to 22nd Street, which gives multimodal access to many residents and businesses alike. The greenway's final extension from 3rd to 7th Street will play into the much larger bicycle and pedestrian network in the City of La Crosse. Proposed design for the King Street Greenway has been through an extensive public engagement process and includes raised alley crossings, permanent and temporary bump out treatments, bioretention bump out planters, a pedestrian refuge island, and rain gardens.

567 / 750 Characters

Check all applicable project benefits, then describe in application narrative:

ENVIRONMENTAL

- Increases likelihood of modal shift to biking, walking, or transit from utilitarian car travel.
- Increases access and connection to the natural environment.

PUBLIC HEALTH - Project would have a demonstrable impact upon public health of applicant community.

ECONOMIC - Project would go beyond community enhancement to address specific "communities of concern," including elderly, disabled, minority, and low-income population. The project is within ½ mile of affordable housing complex(es). The project improves low-income access to transit, jobs, education, and essential services.

SAFETY

This project contains or addresses:

- Collision data
- Lack of adequate safe crossing or access
- Lack of separated facility
- High speed / volume
- Provides sidewalks or pathway, with curb-cuts
- Provides bike lanes, markings, and signage
- Implements traffic calming measures
- Signage and/or markings directed to safety concern
- Provides crosswalk enhancement (striping, refuge island, signal, etc.)

HISTORICAL AND/OR PRESERVATION SIGNIFICANCE – Project would have strong historical or preservation benefit.

ECONOMIC DEVELOPMENT – Project facilitates economic development by increasing bicycle/pedestrian traffic in commercial corridors or by creating a destination that will help retail.

PLEASE NOTE: It is recommended that local funds be used to acquire right of way. WisDOT recommends applicants review the [real estate webpage](#).

Was any real estate acquired or transferred in anticipation of this project?

Yes No

Explain

List any other funding (past or present) used within the proposed project limits (i.e. DNR Stewardship)

Explain

(none)

Is ROW acquisition anticipated for this project?

Yes No

If yes, provide a brief description of the property anticipated for acquisition and check all boxes that apply to ROW acquisition for this project:

Provide a brief description of ROW to be acquired (current owner, zoning concerns, etc.)

- Less than 1/2 acre More than 1/2 acre
 Parklands Large Parcels Temporary interests

If right of way was acquired in anticipation of this project, attach a detailed list of available, completed project and parcel acquisition documentation. Refer to Section 11.2, Records Management, found in the [Local Program Real Estate Manual \(LP RE Manual\)](#).

If right of way was acquired in anticipation of this project, did the acquisition contain any buildings or relocation?

Yes No

If right of way is required, will acquisition occur through a transfer of an adequate interest in real property?

Yes No

Is the project on existing state-owned highway right of way (ROW)?

Yes No

Have you contacted the WisDOT Regional Access Section to inform them of proposed facility within state right of way?

Yes No

Please explain what has been done to date.

For real estate questions, please contact Megan Munden, WisDOT Local Program Statewide Local Program Real Estate Manager, at (715) 392-7962 or megan.munden@dot.wi.gov.

Construction Schedule Restrictions (trout, migratory birds, local events)

Comments

Local Force Account (LFA)

Will the proposed project utilize municipal employees to complete any portion of the construction activities? Yes No

NOTE: LFA work must include labor, equipment and materials. **The purchase of materials only is not considered to be a legitimate project.**

NOTE: Please review WisDOT TAP Guidelines for restrictions on certain LFA work as of July 1, 2015.

Maintenance (only complete this section if project application involves a trail project):

Will the facility be maintained for year-round bicycle-pedestrian access? Yes No

If no to the above and a trail is involved, will snowmobile access be permitted in winter? Yes No

Comments

Anticipated fee for trail use? Yes No

Comments

Anticipated equestrian use on trail? Yes No

Comments

Other Funding Sources

Has there been, or will there be a road improvement project in this project area?

Yes No

If yes, type year:

If yes, check all that apply:

- State Highway Project STP Local Bridge LRIP
- Pavement Replacement Reconstruction New Construction

Has the municipality anticipated, requested or previously received other federal or state funding from WisDOT for the improvement?

Yes No

If yes, please indicate all the other funding sources that are anticipated, have been requested or previously received with the associated project ID(s):

Project Costs, Priorities, and State Fiscal Years:

Complete the section below for the appropriate fiscal years of the application/project cycle. If a sponsor proposes to construct a project in phases throughout multiple years, schedule the project costs as appropriate and provide further details in the project description. In addition to this section, applicants will need to **attach a Cost Line-Item Spreadsheet using Microsoft Excel**. This detailed breakdown of project costs must clarify assumptions made in creating the budget such that a third-party reviewer would be able to substantiate the assumptions. Project requests are not considered for partial funding.

The Cost Line Item Spreadsheet can be uploaded in the "Local Resolution of Support and Other Attachments" section of the application.

Project Cost Guidelines:

WisDOT recommends the following for all proposed TAP projects:

	Infrastructure Projects	Non-Infrastructure Projects
> 5,000 Census Designated Population Areas <i>(i.e., TAP Urban (5,000 – 50,000), TAP Urban (50,000 – 200,000), TAP TMA (>200K+))</i>	Minimum project cost of \$300,000, including any design work. \$100,000 minimum for any federally funded real estate costs.	Minimum project cost of \$50,000.
< 4,999 Census Designated Population Areas <i>(i.e., TAP Rural (<5k))</i>	Minimum project cost of \$50,000.	Minimum project cost of \$20,000.

Applicants may work with the Local Program Manager within their region for assistance to estimate costs more accurately. All estimates will be reviewed by WisDOT Region staff for consistency with current practices and approaches. Also, WisDOT Region staff may revise estimates in these categories due to the complexity of the project or other factors. WisDOT will notify the sponsor of any changes to estimates within the application and determine whether the sponsor wishes to continue with the application with the revised estimate.

NOTE: Requesting design and construction projects in the same fiscal year is not allowed.

Project Delivery Method:

Briefly describe the preferred method of project delivery (i.e., consultant contract, local delivery, etc.)

Delivery Method*

Design

Funding Source:

- 100% Locally Funded (state review is required to be included as 100% locally funded) **OR**

Provide a narrative response attachment answering questions 1 through 5, making sure to provide information in response to each sub-question.

1. PROJECT DESCRIPTION AND OVERVIEW

Provide a general overview of the project, including type of facility or project, location and any other information about the project. Be brief.

The King Street Greenway extension will create vital space for bicyclists and pedestrians of all ages to reach desired destinations including downtown La Crosse, Riverside Park, Cameron Park, and many more. The extension is planned from Front Street to 7th Street as an addition to the existing greenway from 7th to 22nd Street. The greenway's final extension will play into the much larger bicycle and pedestrian network in La Crosse.

The City of La Crosse has been working toward completing the King Street Greenway over the past eight years. Currently, there is funding to complete the project from Front Street to 3rd Street and the 6th Street intersection will be constructed as part of the 6th Street reconstruction project. The final stretch from 3rd to 7th Street will complete the entire King Street Greenway network. The design includes temporary painted bump out treatments on 3rd and 4th Street with a raised alley crossing between the two streets. Between 5th and 7th Street there will be curb extensions on all intersections with bioretention planters and rain gardens on portions of each intersection with a pedestrian refuge island on 7th Street.

1,164 / 2,250 Characters

2. PROJECT PLANNING & PREPARATION & LOCAL SUPPORT

Describe the degree to which this project was planned for and the local support and commitment for the project. If this project is part of a plan (bike-pedestrian plan, safe routes to school plan, transportation plan, comprehensive plan, etc.), describe that plan and the project's priority in that plan. If this is a planning project describe how this project will be integrated into other efforts. For SRTS projects, describe walk/ bike audits, parent surveys and data on crashes that support the selection of this project.

The King Street Greenway has been a priority project for over 10 years, ranking among the top ten recommendations in the 2012 Bicycle and Pedestrian Master Plan. When the Bicycle and Pedestrian Master Plan was updated in 2024, King Street Greenway emerged again as a tier one priority project. Project prioritization was based on multiple factors, including connection to existing bike facilities, connection to schools, connection to parks, connection to frequent destinations, public support, proximity to communities of concern, active trip potential, connection across a key barrier, and connection from north to south La Crosse. The greenway's priority ranking in both plans has reaffirmed community support and the important commitment to multimodal transportation.

La Crosse has been working toward completing the extension since 2021 when they hired Short Elliot Hendrickson Inc. (SEH) to assist with planning and design. Over the past couple years, SEH assisted the City by organizing public engagement, conducting data collection, and composing a final design and plan. Through this extensive preparation and collaboration, the City has built strong local support and established a clear path toward implementation.

1,227 / 2,250 Characters

3. HISTORY OF SPONSOR SUCCESS, DELIVERABILITY AND COMMITMENT TO MULTIMODAL

How will the project be implemented on time? What obstacles or problems must be overcome to implement this project? Considering project obstacles, describe how the project sponsor will comply with state law. Will project commencement occur within four years of the award date, and project completion within approximately six years?

Please describe prior experience with other multimodal projects and success in delivering those projects in the year in which they were scheduled. For example, were you able to deliver the project in the state fiscal year it was programmed? In the last 10 years, has the sponsor ever had to turn back awarded federal funds related to a transportation project? Please explain.

If problems were experienced in the past, what will be done on this project to ensure successful completion? Describe the project sponsor's commitment to multimodal programs and facilities generally. Examples of a commitment could be a local "complete streets" ordinance, multimodal advisory committees, or the inclusion of multimodal accommodations in other local program projects sponsored by the municipality.

City planners have worked closely with the Engineering Department, City Council and Mayor, and consultants to work toward completing this greenway. The final priority is funding. With a clear strategy and goal, the King Street Greenway has little to no foreseen obstacles for timely and efficient implementation. The City has been working toward getting this project funded since 2023 and earlier. In hopefulness of TAP grant funding, King Street Greenway was requested and approved in the 2025-2029 Capital Improvement Plan (CIP). The City of La Crosse has committed to planning and design funding for this project in 2026 and will anticipate beginning design with expected future construction. In October 2025, the Bicycle and Pedestrian Advisory Committee unanimously approved the resolution to apply for TAP funding for the King Street Greenway. The resolution will be going to Common Council in November 2025.

La Crosse has proven a commitment to multi-modal projects. Past projects that have been completed using State and Federal funding include Pammel Creek Multi-use Trail, Southern Bluffs Trail, Highway 16 Side-path Trail, VIP Trail, Gund Trail, Three Rivers Trail, North La Crosse River Trail, North Bank Trail, King Street and West Avenue intersection, and Gillette Street bike lanes. Current planning and design efforts are underway for the Wagon Wheel Trail and Avon Street projects, which received TAP funding in the 2022 and 2023 cycles, respectively, as well as for Green Bay Street, which is supported through STP-Urban funds.

1,545 / 2,250 Characters

4. PROJECT UTILITY & CONNECTIVITY

For Infrastructure Projects

Describe the degree to which this project serves utilitarian rather than recreational purposes and how, if at all, the project adds connectivity to the state's multi-modal

transportation network, including bicycle, pedestrian and transit facilities. Describe how, if at all, the proposed project would connect to these existing land uses: park, school, library, public transit, employment and/or retail centers, residential areas, other. Describe how this project fills a multimodal gap or serves as a backbone to a local multimodal network.

For Planning Projects

Describe how the implementation of a plan would serve a broad geographic area and add connectivity to the state's multimodal transportation network. Describe how this project fills a multimodal gap or serves as a backbone to a local multimodal network.

For Safe Routes to School Programming Projects

Will the project get a higher percentage of children walking and biking to school - addresses clear safety problems for children already walking/biking. Address the following desired outcomes: reduction in parent concerns that keep them from allowing children to walk/bike; potential for changes in hazard busing; change in policy limiting walking/biking to school; increased school commitment to promoting walking/biking; improved driver behaviors in the school zone; making it more appealing for children to walk/bike; more law enforcement participation in walking/biking issues.

This project creates an essential multi-modal connection to the larger transportation network in La Crosse. It will connect to the Riverside Park shared use path, 2nd Street cycle track, 17th Street Greenway, and extend to 22nd Street. This allows students and residents near University of Wisconsin-La Crosse and Viterbo University to get downtown safely via active transportation. The King Street Greenway extension passes by important community amenities such as multiple restaurants, three art centers, a grocery store, La Crosse Polytechnic School, Cameron Park, Municipal Transit Utility's (MTU) Grand River Station and two Drift Cycle bike share stations.

The King Street Greenway serves as a vital connection for downtown residents and beyond. The greenway will create an essential connection to job opportunities in downtown La Crosse, where a quarter of the City's jobs are located. This vital multimodal connection to jobs in addition to the MTU station, which offers bus routes around the city and to Onalaska and La Crescent, cannot be overlooked. This link creates opportunity for all forms of transportation and will serve users to reach destinations citywide.

1,177 / 2,250 Characters

5. PROJECT BENEFIT – ENVIRONMENTAL, LIVABILITY, ECONOMIC, PUBLIC HEALTH, HISTORICAL PRESERVATION, ECONOMIC DEVELOPMENT, AND SAFETY

Describe the benefits likely derived from the proposed project; this description should correspond to the project benefit section. Beyond connectivity, it is advantageous that a potential TAP project demonstrates a tangible contribution to a community benefit.

Environmental-The King Street Greenway will not only provide an urban greenway space for residents living downtown, but it will also connect them to two parks and the Mississippi River. Providing residents with an accessible and safe street to walk and bike will encourage and increase the likelihood of a modal shift to active transportation.

Public Health-Greenways can encourage healthy behavior both physically and mentally. Greenways can take the stress out of daily commutes and promote social interaction among residents. The health benefits of the King Street Greenway provide residents in an urban census tract room to enjoy nature and use active transportation.

Economic Benefit – This greenway extension project will be constructed in census tract three, which is an identified community of concern in our analysis conducted with the Bicycle and Pedestrian Master Plan. Our analysis found this area, and much of our downtown, as an area of concern due to the economic opportunity, access to a vehicle, air quality, tree canopy coverage, prevalence of coronary heart disease, income, race and ethnicity, educational attainment, and youth and senior population. Being in our downtown, and between two major state highways, this area sees an abundance of traffic, which can have lasting impacts such as pollution, poor air quality, and lower property values. This greenway will not only reduce traffic volume, but supports the residents with an affordable, safe, and environmentally friendly alternative.

Safety-The King Street Greenway is intended to greatly increase safety in the downtown area. According to the Wisconsin Community Crash Maps, there have been seven bicycle and pedestrian crashes on this section of King Street in the past 5 years. The greenway can provide a safer route for cyclists and pedestrians alike by implementing traffic calming measures.

Economic Development- As the greenway has been designed and built, there has been (and continues to be) community interest in continuing the greenway west of 7th Street to facilitate a connection to downtown La Crosse. This connection creates the ability for residents and tourists alike to explore local downtown shopping and have access to employment opportunities.

2,249 / 3,000 Characters

Applicants must **submit the Local Resolutions of Support to the respective WisDOT Regional Office on or before 5 pm on December 29, 2025. All other components of applications are due on or before 5PM October 31, 2025.** and must include the following documents:

Cost Line Item Spreadsheet *

Local Resolution of Support

Please confirm your understanding of the following project condition by **typing your name, title and initials** at the bottom of this section. **A Head of Government/Designee with fiscal authority for the project sponsor must initial this section and sign this application. Sponsor consultant(s) should not initial or sign project applications.**

WisDOT will deem ineligible any application that does not provide confirmation to this section.

- a. Private organizations proposing projects must have a public project sponsor such as a local government unit.
- b. The project sponsor or private partner must provide matching dollar funding of at least 20% of project costs.
- c. This is a reimbursement program. The project sponsor must finance the project until federal reimbursement funds are available.
- d. The project sponsor will pay to the state all costs incurred by the state in connection with the improvement that exceed federal financing commitments or other costs that are ineligible for federal reimbursement.
- e. The project sponsor must not incur costs for any phase of the project until that phase has been authorized for federal charges and the WisDOT Region has notified the sponsor that it can begin incurring costs. Otherwise, the sponsor risks incurring costs that will not be eligible for federal funding.
- f. The project sponsor will follow the applicable federal and state regulations required for each phase of the project. Some of these are described in the Guidelines. The requirements include, but are not limited to, the following: a Qualifications Based Selection (QBS) process for design and engineering services (Brooks Act); real estate acquisition requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 and amendments; competitive procurement of construction services; Davis-Bacon wage rates on federal highway right-of-way projects; WisDOT FDM & Bicycle Facilities Handbook; ADA regarding accessibility for the disabled; MUTCD regarding signage; U.S. Department of the Interior standards for historic buildings. Each WisDOT Region can provide copies of the current Sponsor's Guide to Non-Traditional Transportation Project Implementation, and references for sections of the Facilities Development Manual (FDM) and other documents necessary to comply with federal and state regulations. **Applicants who plan to implement their projects as Local Let Contracts using the Sponsor's Guide must become certified that they are capable of undertaking these projects.**
- g. If applying for a bicycle facility, it is understood that All Terrain Vehicles (ATVs) are not allowed. Snowmobile use is only allowable by local ordinance. Trail fees may only be charged on a facility if the fees are used solely to maintain the trail. WisDOT reserves the right to require that facilities be snowplowed as part of a maintenance agreement where year-round use by bicyclists and pedestrians is expected.
- h. The project sponsor agrees to maintain the project for its useful life. Failure to maintain the facility, or sale of the assets improved with FHWA funds prior to the end of its useful life, will subject the sponsor to partial repayment of federal funds or additional stipulations protecting the public interest in the project for its useful life.
- i. If the project sponsor should withdraw the project, it will reimburse the state for any costs incurred by the state on behalf of the project.
- j. The project sponsor agrees to state delivery and oversight costs by WisDOT staff and their agents. These costs include review of Design and Construction documents for compliance with federal and state requirements, appropriate design standards, and other related review. These costs will vary with the size and complexity of the project. The sponsor agrees to add these costs to the project under the same match requirements 80% / 20% match requirements.
- k. Projects that are fully or partially federally funded must be designed in accordance with all applicable federal design standards, even if design of the project was 100% locally funded.
- l. As the project progresses, the state will bill the project sponsor for work completed that is ineligible for federal reimbursement. Upon project completion, a final audit will determine the final division of costs as between the state and the project sponsor. If reviews or audits reveal any project costs that are ineligible for federal funding, the project sponsor will be responsible for any withdrawn costs associated with the ineligible work.
- m. ***For 100% locally-funded design projects, costs for design plan development and state review for design are 100% the responsibility of the local project sponsor. Project sponsors may not seek federal funding only for state review of design projects.
- n. The project sponsor acknowledges that the requisite project commencement requirement and that failure to comply with the applicable commencement deadline will jeopardize federal funding. Commencement is within four years of the date of the project award. The project must be commenced within four (4) years of the project award date according to Sec. 85.021, Wis. Stats. For construction projects, a project is commenced when construction is begun. For planning projects, a planning project is commenced when the planning study is begun. For non-infrastructure projects that do not fall within any of the above categories, a project is considered commenced on the date that WisDOT receives the first reimbursement request from the project sponsor, as noted on form DT1713 in the 'Date Received' field.
- o. The project sponsor acknowledges that the requisite project completion timeline for approved TAP projects will be memorialized in a state-municipal agreement, and failure to comply with the applicable project timeline will jeopardize federal funding.
- p. Federally-funded transportation construction projects, with the exception of sidewalks, are likely improvements that benefit the public at large. Improvements of this type cannot generally be the basis of levying a special assessment pursuant to Wis. Stat. § 66.0703. Municipalities who wish to obtain project funding via special assessment levied against particular parcels should seek advice of legal counsel. See Hildebrand v. Menasha, 2011 WI App. 83.
