

Used Lamp Management Instructions for Businesses

The La Crosse County Household Hazardous Materials (HHM) facility accepts many different types of business-generated used light bulbs (i.e. "Lamps") including black lights, compact fluorescent (CFL), fluorescent tubes, mercury vapor, metal halide, neon, high-pressure sodium vapor and ultraviolet.

When bringing used lamps to the HHM, please follow these steps:

- Package lamps in a closed box.
- Write the number and type of bulbs on the end of the box.
- Label and date the box with the words "Universal Waste Lamps."
- Include the date when lamps were first placed inside the box.

See the example figure below:
